The Project Management Body of Knowledge (PMBOK[®]) is an inclusive term that describes the sum of knowledge within profession of project management. As with other professions such as law, engineering, and accounting, the body of knowledge rests with the practitioners and academics that apply and advance it. The full project management body of knowledge includes knowledge of proven traditional practices that widely applied, as well as knowledge of innovative and advance practices that have seen more limited use, and includes both published and unpublished material. - (PMI IC site)
